

FYI: At 1807 I received a call from Gary Perowitz with CHS reporting that an applicator traveling along Highway 263 in Davison County, approximately ¼ to ½ mile west of the intersection of 399th Avenue and 263rd Street, entered the ditch and rolled. There were no injuries. The applicator was carrying a mix of generic lorsban and generic warrior. They are unsure yet if any of the chemical or any diesel fuel has leaked. The area is dry but they are concerned about runoff if there is any precipitation.

I notified Kelsey Newling with DANR and she will be contacting Gary.
