Re: No Further Action for Arnie's Service – DANR File No. 2019.006, Mitchell, SD

Dear Ms. Reyelts:

The South Dakota Department of Agriculture and Natural Resources (DANR) has reviewed the available information regarding the petroleum hydrocarbon release at Arnie's Service in Mitchell, South Dakota and determined further investigation is unwarranted. As a result of this determination, the DANR is granting this release case No Further Action designation. Contamination has not been cleaned to state standards; however, the DANR has determined, based on available information, there is no current risk to human health or further risk to the environment.

If future problems arise from the remaining contamination, you will be responsible for conducting additional assessment or remediation. You may also be responsible for further assessment and cleanup actions if the use of this property or adjacent affected properties indicate changes that increase the risk to human health and the environment from leftover contamination. The No Further Action designation will be recorded in the DANR's release database and can be found at <https://apps.sd.gov/NR42InteractiveMap>.

You will need to abandon all remaining monitoring wells associated with this release site in accordance with DANR's Well Construction Standards ARSD 74:02:04 within 30 days and submit written documentation to DANR showing that the wells have been properly abandoned.

Thank you for your cooperation in protecting the ground water resources of South Dakota. If you have questions or concerns about this site's No Further Action designation, please contact Kayla Fawcett of my staff at (605) 773-3296 or [kayla.fawcett@state.sd.us](mailto:kayla.fawcett@state.sd.us).

Sincerely,

Hunter Roberts  
Secretary
