

Weather Warning Guidelines

The Davison County Office of Emergency Management is responsible for the coordination of warning systems available to the jurisdiction during emergencies and disasters as well as severe weather events. The following are guidelines used by the jurisdiction when severe weather threatens. These are to be used as guidelines and may be modified if information is available that would warrant deviations in the guidelines.

Alerts and Warnings Resources

- Radio Stations – Local Stations
- Television Stations – Local Stations
- Plectron (Indoor Warning) System
- NOAA Weather Radio – National Weather Service
- Outdoor Warning System (Sirens)

Guidelines

Severe Weather Watches (Thunderstorm & Tornado)

- Issued by National Weather Service
- Warning Resources Utilized: Radio, Television, Plectron System, & NOAA Weather Radio.

Severe Thunderstorm Warnings

- Issued by National Weather Service
- Warning Resources Utilized: Radio, Television, Plectron System, & NOAA Weather Radio.

Tornado Warnings

- Issued by National Weather Service
- Warning Resources Utilized: Outdoor Warning Sirens, Radio, Television, Plectron System, & NOAA Weather Radio.

Special Notes

- If the County is sectored by the National Weather Service, i.e., South-east Davison County, ALL jurisdictions will be alerted.
- The Alert & Warning devices are utilized to Alert & Warn the citizens of Davison County of approaching weather. They provide the public with initial information of the possibility of danger. Residents should tune to local media or NOAA Weather Radio for updates and information.
