Re: No Further Action, Pertaining to the removal of three underground storage tanks (USTs),
Former Freedom Valu #42, 512 South Sanborn Avenue, Mitchell, SD. Facility ID# 08-00038.
Environmental Event #2025.131.

Mr. Dailey:

Staff from the South Dakota Department of Agriculture and Natural Resources (DANR) have reviewed the available information for the above-referenced property and determined that further assessment will not be required. DANR has determined, based on the available site information, there is no current risk to human health or further risk to the environment. Therefore, DANR will assign No Further Action status to DANR file number 2025.131.

It should be noted that soil contamination above department action levels exists on site. If construction activities result in contaminated soil being removed, it must be properly disposed of at a permitted facility.

In addition, if future exposure pathways are created or if problems arise from the remaining contamination associated with this release, you may be responsible for performing additional assessment or clean-up activities. You may also be responsible for further assessment and cleanup actions if the use of this property changes, which increases the risk to human health and the environment from contamination documented at this property. The No Further Action designation will be recorded in DANR's release database and can be found at <https://apps.sd.gov/NR42InteractiveMap>.

If you have questions or concerns about your site's No Further Action designation, please contact Marshall Brown of my staff at (605) 773-3296. Thank you for your cooperation in protecting South Dakota's water resources.
